Experiments on packet capture tools: Wireshark.

Capturing and Analysing packets using wireshark Tool.

To filter, capture, view, packets in wireshark Tool. Capture 100 packets from the Ethernet: IEEE 802.3 LAN Interface and Save it.

Procedure:

Select Local Area Connection in Wireshark
Go to capture option
Select Stop capture automatically after 100 packets.
Then click Start capture
Save the packets.

1. Create a filter to display only TCP/UDP packets, Inspect the packets and provide the flow graph.

Procedure:

Select Local Area Connection in Wireshark.
Go to capture Option
Select Stop capture automatically after 100 packets

Then click the Start Capture

Search TCP packets in Search bar.

To see flow graph click Statistics flow graph

Save the packets.

2. Create a filter to display only ARP packets and inspect the packets.

procedure:

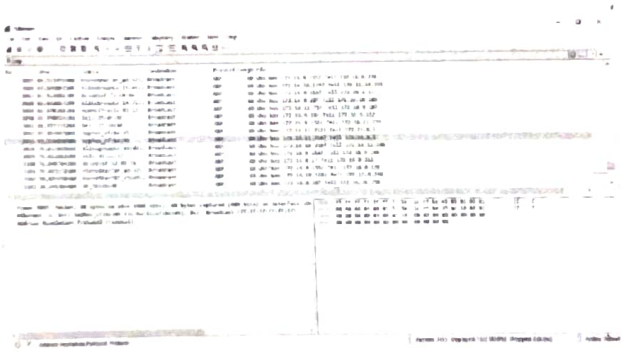

Go to Capture Option

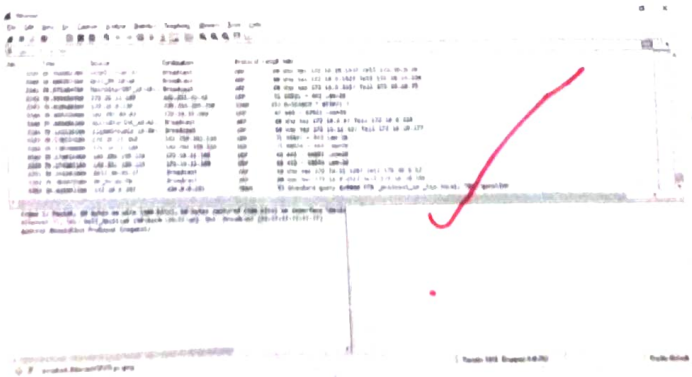

Select Stop capture automatically after 100 packets.

Then click Start Capture.

Search ARP packets in Search bar.

Save the packets.

8. Create a file to display only DNS packets and provide the flow graph

Procedure:

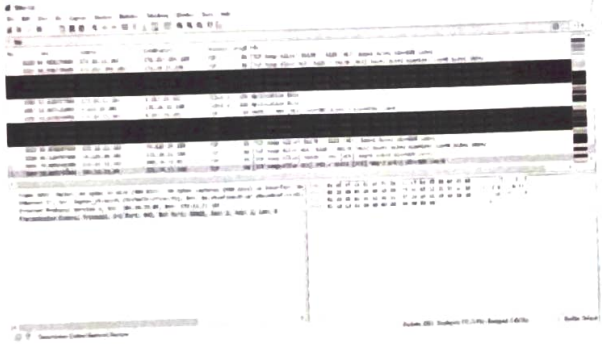

Go to capture option

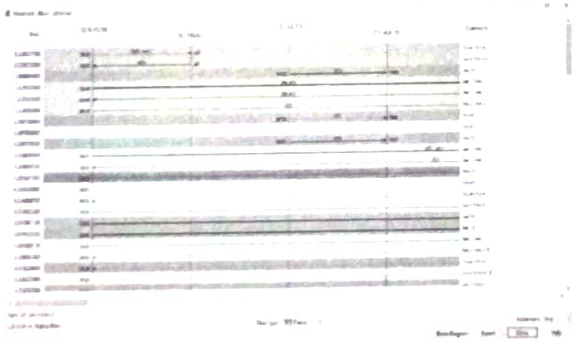

Select Stop capture automatically after 100 packets.

Then click Start capture

Search DNS packets in Search bar.

To See the flow graph click Statistics flow graph.

Result:

Capturing and Analysing ~~Packets~~ using Wireshark are studied and execute Successfully.
